MTU VetClub is an educational project for veterinarians,

that collaborates with and employs veterinarians, experts in their fields of research.

By examining the composition of this feed, the following inferences and conclusion were drawn:

• [Anna Suaro, Veterinarian, Nutritionist:](#)

BOWL WOW's chicken and apple feed for adult cats.

Estimation for a cat of 4 kg with an average activity:

- The feed meets the needs for protein, fat and fiber.
- The ratio of calcium and phosphorus is 1:1, which is a norm for a grown-up cat.
- The mineral content — calcium, phosphorus, magnesium and potassium — is well-balanced, with no deficiency or surplus.
- The content of vitamins: vitamins A, D, E, B4 conform to norms and values, with no deficiencies or surpluses.
- Moreover, the feed features taurine, an aminoethionic acid indispensable for cats.
The content of taurine satisfies the needs of the pet which this mixture has been made for.
- The food is well-balanced and meets the needs of adult cats.

• [Ilga Dmitrievna Drozdetskaya, Veterinarian, Gastroenterologist:](#)

Of late, both we and pet owners have encountered certain complications in finding and acquiring habitual foreign brands of feed well known to us all. That is why, it is welcome news that quality feeds of domestic production emerge in our market.

Judging by the composition provided to us by the manufacturer, the BOWL WOW diet is excellent for kittens and adult cats alike. And, given that the manufacturer closely cooperates with veterinary specialists and scholarly institutions in order to bring forth a quality product that meets the demands of your pet's body, the product inspires confidence and a desire to use it.

We recommend this food as a super premium lineup for feeding small domestic pets. We find the formulation of these diets totally acceptable and sufficient to sustain a stable physiological condition of your pets.
